

Please reject the NAB's petition 04-160. Satellite radio is a great service, that I pay for. I understand why NAB would like to put up roadblocks to satellite radio, but if they provided the variety that satellite does, they wouldn't have the public abandoning them. Before satellite radio, I didn't listen to regular broadcasts, anyway. I always had playing a CD. I couldn't stand the same two songs from every group, nor the commercials. Satellite is much better, and I can leave it all day on the same station. Thank you for your time, Kathy Watson, XM subscriber
